

# GREENLAWN SOD & TURF

*Live Where You're Living*

## COLORADO'S NATIVE BUFFALOGRASS™

Colorado's Native Buffalograss™ is a perennial, warm season grass that is naturally very drought tolerant and insect/disease resistant, thriving in full sun conditions and extreme climates. It possesses all the best qualities of a native turfgrass and is ideal for low maintenance areas such as large residential or commercial lawns, parks, street parkways, and even green roofs. The soft grass blades maintain a rich green color while requiring low fertility and tolerating some traffic. Colorado's Native Buffalograss™ requires limited mowing and can be left unmowed for a natural look.
