

# GREENLAWN SOD & TURF

*Live Where You're Living™*

## CONSERVATURF™ RT - FESCUE

Colorado's RT-Fescue is a dark green, medium bladed hybrid tall fescue blend, hybridized for Colorado. Including LS™ Lateral Spread Technology by MVS to aggressively fill bare spots and establish a dense, resilient turf. Shade-tolerant and naturally insect- and disease-resistant, it requires up to 30-50% less water than bluegrass and only three low-to-medium fertilizer applications per year. Lower-growing and easier to maintain than traditional grasses, RT-Fescue is ideal for home lawns, commercial spaces, parks, and golf course roughs where water conservation and durability matter most. Convert and Conserve™ Colorado's water resources with Conservaturf™ RT-Fescue.

### Key Highlights:

Low  
Mowing

Drought  
Tolerance
