Live Where You're Living

DOG TUFF™ - Low water turf

DOG TUFF™ is part of our **ConservaTurf™** lineup — a drought-resistant, highly durable, soft-bladed warm-season Bermuda grass built for high-traffic yards and homes with dogs. It handles running and play while staying comfortable under bare feet and paws, and it's resistant to urine damage, making it an ideal natural solution for pet owners. As a **ConservaTurf™** variety, it uses 70–80% less water than Kentucky bluegrass and thrives in full, hot sun, maintaining a rich green color through summer. Growing 4–6 inches tall, it requires less mowing and forms a dense turf that helps suppress weeds. For those wanting the durability of artificial turf with the cooling comfort of real grass, **DOG TUFF™** is the superior natural alternative.
